Citi Trends, Inc.
Notes to the Condensed Financial Statements
(unaudited)

November 3, 2007

1. Basis of Presentation

The condensed balance sheet as of November 3, 2007, the condensed statements of operations for the thirty-nine and thirteen-week periods ended November 3, 2007 and October 28, 2006, and the statements of cash flows for the thirty-nine week periods ended November 3, 2007 and October 28, 2006 have been prepared by Citi Trends, Inc. (the "Company"), without audit. In the opinion of management, such statements include all adjustments (which are of a normal recurring nature) considered necessary to present fairly the Company's financial position as of November 3, 2007 and February 3, 2007 and its results of operations and cash flows for all periods presented. The condensed balance sheet as of February 3, 2007 has been derived from the audited financial statements as of that date, but does not include all required year end disclosures. It is suggested that these condensed financial statements be read in conjunction with the financial statements and the notes thereto included in the Company's latest shareholders' annual report (Form 10-K).

The accompanying unaudited Condensed Financial Statements are also prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the interim period ended November 3, 2007 are not necessarily indicative of the results that may be expected for the fiscal year ending February 2, 2008.

The following contains references to years 2007 and 2006, which represent fiscal years ending or ended on February 2, 2008 (fiscal 2007) and February 3, 2007 (fiscal 2006), respectively. Fiscal 2007 has a 52-week accounting period and fiscal 2006 had a 53-week accounting period.

2. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

3. Stock-Based Compensation

In 1999, the Company established the 1999 Citi Trends, Inc. Stock Option Plan (the "1999 Plan"). The 1999 Plan provided for the grant of incentive and nonqualified options to key employees and directors. The Board of Directors determined the exercise price of the option grants. The option grants generally vested in equal installments over four years from the date of grant and are generally exercisable up to ten years from the date of grant, which is the contractual life of the options. The Company authorized up to 1,950,000 shares of common stock for issuance under the 1999 Plan.

On March 8, 2005, the Company adopted the 2005 Citi Trends, Inc. Long Term Incentive Plan (the "Incentive Plan"), which became effective upon the consummation of the Company's initial public offering in May 2005. The Incentive Plan superseded and replaced the 1999 Plan. The Incentive Plan provides for the grant of incentive and nonqualified options as well as other forms of stock-based compensation to key employees and directors including the issuance of nonvested stock. The Board of Directors determines the date of the option grants and sets the exercise price to be equal to the closing market price of the Company's stock on the date of grant. Grants of options and nonvested shares generally vest in equal installments over four years from the date of grant and options are generally exercisable up to ten years from the date of grant. Under the Incentive Plan, the Company may issue up to 1,300,000 shares of common stock upon the exercise of stock options and other equity incentive awards. In August 2006, the plan was amended to permit the exercise price of stock options to be satisfied through net share settlements.

For fiscal years prior to fiscal 2006, the Company applied the intrinsic-value-based method of accounting prescribed by APB Opinion No. 25 and related interpretations including Financial Accounting Standards Board ("FASB") Interpretation (FIN) No. 44, *Accounting for Certain Transactions Involving Stock Compensation, an interpretation of APB Opinion No. 25*, to account for its fixed-plan stock options. Under this method, compensation expense was recorded on the date of grant only if the then-current fair value of the underlying stock exceeded the exercise price. The Company recognized the fair value of stock rights granted to non-employees in the financial statements. Statement of Financial Accounting Standards ("SFAS") No. 123, *Accounting for Stock-Based Compensation*, and SFAS No. 148, *Accounting for Stock-Based Compensation-Transition and Disclosure, an amendment of FASB statement No. 123*, established accounting and disclosure requirements using a fair-value-based method of accounting for stock-based employee compensation plans. As permitted by the accounting standards, the Company continued to apply the intrinsic-value based method of accounting as described previously and adopted only the disclosure requirements of SFAS No. 123, as amended.

Effective January 29, 2006, the Company began recording compensation expense associated with all stock options and other forms of equity compensation in accordance with SFAS No. 123 (revised 2004) *Share-Based Payment* ("SFAS No. 123R"), as interpreted by SEC Staff Accounting Bulletin No. 107. The Company selected the "Modified Prospective" transition approach for adoption of SFAS No. 123R. Under the Modified Prospective approach, prior periods were not restated. Compensation expense for the unvested portions of grants awarded prior to January 29, 2006 will be recognized over the grants' remaining service periods using the compensation cost calculated previously for pro-forma disclosure under SFAS 123. For awards granted after January 28, 2006, the Company is recognizing compensation expense based on the grant-date fair value calculated in accordance with SFAS No. 123R. Such expense will be recognized on a straight-line basis over the service period of the option recipients which is generally equal to four years for employees and one year for non-employee directors.

Under SFAS No. 123R, the fair value of each option award is estimated on the date of grant using the Black-Scholes-Merton option pricing model, which uses the assumptions described herein. Expected volatility is based on estimated future volatility of the Company's common stock price. Having completed its initial public offering in May 2005, the Company has limited historical data regarding the price of its publicly traded shares. To estimate future volatility of the Company's stock price, the stock price volatility of similar entities for which shares have been publicly traded for a period of seven years or more was measured. (Seven years is used because the weighted average expected life of the Company's stock options is between six and seven years). The Company uses historical data to estimate forfeitures used in the model. The expected term of options granted is based on guidance provided by the SEC Staff Accounting Bulletin 107 ("simplified method" for "plain vanilla" options). The simplified method (available for entities which do not have sufficient historical exercise data available for making a refined estimate of expected term) assumes a 10 year contractual term with vesting at a rate of 25% per year. Accordingly, expected term = ((vesting term + original contractual term)/2). The risk-free interest rate for the periods which corresponds with the expected life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

A summary of the status of stock options under the Company's stock option plans and changes during the thirty-nine weeks ended November 3, 2007 is presented in the table below:

Options	Wtd Avg Exercise Price	Wtd Avg Remaining Contractual Term (Years)	Aggregate Intrinsic Value
---------	------------------------------	---	------------------------------

Outstanding at beginning of year	818,104	\$	7.66	5.7	\$	—
Granted	0		0	0		—
Exercised	(224,813)		1.74	4.0		—
Net shares settled	(1,505)		8.40	6.3		—
Forfeited	(22,770)		17.15	7.6		—
Outstanding at November 3, 2007	<u>569,016</u>	<u>\$</u>	<u>9.61</u>	<u>5.3</u>	<u>\$</u>	<u>5,778,933</u>
Vested at November 3, 2007	<u>422,105</u>	<u>\$</u>	<u>4.57</u>	<u>4.4</u>	<u>\$</u>	<u>5,437,578</u>
Expected to vest at November 3, 2007	<u>548,446</u>	<u>\$</u>	<u>9.16</u>	<u>5.2</u>	<u>\$</u>	<u>5,736,229</u>

At November 3, 2007, the range of exercise prices was \$0.38 to \$44.03. At October 28, 2006, the range of exercise prices and weighted-average remaining contractual life of outstanding options was \$0.38 to \$42.51 and 5.5 years, respectively.

During the thirty-nine weeks ended November 3, 2007 and October 28, 2006, excess tax benefits realized from the exercise of stock options were \$3,172,000 and \$8,419,000, respectively. Such benefits were \$113,000 and \$1,074,000 for the thirteen-weeks ended November 3, 2007 and October 28, 2006, respectively. No grants of options were made during the thirty-nine weeks ended November 3, 2007. The weighted average grant-date fair value of options granted during the thirty-nine and thirteen weeks ended October 28, 2006 was \$21.96 and \$16.65 per share, respectively, or \$1,970,000 and \$54,000, respectively, for all options granted, net of estimated forfeitures. Cash received from options exercised totaled \$383,000 and \$786,000 for the thirty-nine weeks ended November 3, 2007 and October 28, 2006, respectively, and \$34,000 and \$47,000 for the thirteen weeks ended November 3, 2007 and October 28, 2006, respectively.

The Company recognized \$379,000 and \$247,000 in compensation expense for option grants for the quarters ended November 3, 2007 and October 28, 2006, respectively. For the first thirty-nine weeks of the year, such expense totaled \$690,000 and \$662,000 in fiscal 2007 and fiscal 2006, respectively.

As of November 3, 2007, the total compensation cost related to nonvested stock option grants that will be incurred in future periods amounts to \$1,623,000. The weighted-average period over which this amount is expected to be recognized is 24 months. The Company's stock option plan allows the Company to issue new shares from shares authorized for issuance or repurchase shares on the open market to satisfy employee stock option exercises. The Company does not currently plan to repurchase shares.

The Company's Incentive Plan allows for grants of nonvested stock having a fixed number of shares. On March 26, 2007, the Company issued its initial grant of shares of nonvested stock to key employees and directors. Shares granted to employees vest in equal installments over four years from the date of grant. Shares issued to directors vest one year from the date of grant. The Company records compensation expense on a straight line basis over the requisite service period of the stock recipients which is equal to the vesting period of the stock. Total compensation cost is calculated based on the fair market value of the shares on the date of grant times the number of shares granted. In accordance with the provisions of SFAS No. 123R, the fair market value of the shares is equal to the closing market price on the date of grant. Using an estimated forfeiture rate equal to 8.5%, the Company expects to recognize \$1,745,000 in compensation expense from the grants of nonvested stock over the requisite service period. Accordingly, \$398,000 in compensation expense arising from nonvested stock grants was recognized during the thirty-nine weeks ended November 3, 2007, including \$164,000 in the third quarter.

A summary of activity related to nonvested share awards during the thirty-nine week period ended November 3, 2007 is as follows:

	Nonvested Shares	Wtd Avg Grant Date Fair Value
Outstanding at beginning of year	—	\$ —
Granted	62,774	43.52
Forfeited	(3,409)	43.57
Outstanding at November 3, 2007	<u>59,365</u>	<u>\$ 43.52</u>

4. Earnings per Share

Basic earnings per share is based on the weighted average number of common shares outstanding. Diluted earnings per share is based on the weighted average number of common shares outstanding plus the incremental shares that would have been outstanding upon the assumed exercise of all dilutive stock options and unvested stock. During loss periods, diluted earnings per share is based on the weighted average number of common shares outstanding.

The following table is a reconciliation of the number of average common shares outstanding used to calculate basic earnings per share to the number of common shares and common share equivalents outstanding used in calculating diluted earnings per share for the thirteen weeks and the thirty-nine weeks ended November 3, 2007 and October 28, 2006:

	Thirty-nine Weeks Ended	
	November 3, 2007	October 28, 2006
Weighted average number of common shares outstanding	13,917,271	13,515,645
Incremental shares from assumed exercises of stock options	317,745	516,088
Weighted average number of common shares and common stock equivalents outstanding	<u>14,235,016</u>	<u>14,031,733</u>
	Thirteen Weeks Ended	
	November 3, 2007	October 28, 2006
Weighted average number of common shares outstanding	14,022,549	13,583,263
Incremental shares from assumed exercises of stock options	—	499,371

According to SFAS No. 128, *Earnings per Share*, the dilutive effect of stock-based compensation arrangements is determined using the treasury stock method. This method assumes that the proceeds the Company receives from the exercise of stock options and nonvested stock are used to repurchase common shares in the market. The adoption of SFAS No. 123R, *Share-Based Payment*, requires the Company to include as assumed proceeds the amount of stock-based compensation cost attributed to future services and not yet recognized, and the amount of tax benefits (both deferred and current), if any, that would be credited to additional paid-in capital assuming exercise of the options and vesting of nonvested stock. For the thirty-nine weeks ended November 3, 2007 and October 28, 2006, there were 76,500 and 75,800 options outstanding, respectively, to purchase shares of common stock excluded from the calculation of diluted earnings per share because of antidilution. For the thirty-nine weeks ended November 3, 2007 and October 28, 2006, there were no shares of nonvested stock included in the calculation of diluted earnings per share because of antidilution.

5. Marketable Securities

Marketable securities consist of highly liquid, auction rate municipal securities of at least grade AA by Standard and Poor's or Aa by Moody's. While the underlying security has a long-term nominal maturity, the interest rate is periodically reset through "Dutch Auctions" typically every seven to forty-nine days. As of November 3, 2007, all auction rate securities held by the Company were purchased with reset periods of 35 days. The Company has the opportunity to sell its investment during such periodic auctions subject

to the availability of buyers. Since these auction rate securities are priced and subsequently trade at short-term intervals, they are classified as current assets.

The Company classifies all investments as available-for-sale. Available-for-sale securities are carried at estimated fair value, based on available market information, with unrealized gains and losses, if any, reported as a component of stockholders' equity. As a result of the resetting variable rates, the carrying value of available-for-sale securities approximates fair market value due to their short maturities. For these reasons, the Company has no cumulative gross unrealized or realized gains or losses from these investments. All income generated from these investments is recorded as interest income. The Company has no investments considered to be trading securities.

6. Revolving Lines of Credit

In September 2003, the Company entered into an annual unsecured revolving line of credit with Bank of America that expired on June 26, 2007. This facility was renewed for a period of one year, expiring June 30, 2008. The line of credit provides for aggregate cash borrowings up to \$3,000,000. Borrowings under the credit agreement bear interest at the London Interbank Offered Rate ("LIBOR") plus 2.00%. At November 3, 2007, there were no outstanding borrowings on the unsecured revolving line of credit.

7. Commitments and Contingencies

Legal

The Company from time to time is involved in various legal proceedings incidental to the conduct of its business, including claims by customers, employees or former employees. While litigation is subject to uncertainties and the outcome of any litigated matter is not predictable, the Company is not aware of any legal proceedings pending or threatened against it that it expects to have a material adverse effect on its financial condition, results of operations or cash flows.

Construction

The Company has executed various agreements with a construction company and certain other providers of services and equipment, which commit the Company to the expansion of its distribution center in Darlington, South Carolina and the later implementation of a new warehouse management system. The distribution center is expected to be substantially completed in the spring of 2008, while implementation of the new warehouse management system is anticipated in the last half of 2008. The aggregate cost of these projects is presently expected to range from \$14 million to \$15 million. Through November 3, 2007, approximately \$2.3 million of the cost of the projects has been paid.

8. Shelf Registration Statement

On April 5, 2007, the Company filed a shelf registration statement on Form S-3, which registration statement was amended on May 9, 2007, to cover the offer and sale, from time to time of up to 3,000,000 shares of the Company's common stock, by Hampshire Equity Partners II, L.P. and its affiliates and up to an additional 300,000 shares of the Company's common stock by other possible selling stockholders consisting of certain officers and directors and other stockholders of the Company. The registration statement was filed pursuant to the terms of a registration rights agreement between Hampshire Equity Partners II, L.P. and the Company. On June 18, 2007, the Company closed an underwritten offering of 2,455,250 shares of the Company's common stock, by certain stockholders at a public offering price of \$37.92 per share, pursuant to the shelf registration statement. The Company did not receive any proceeds from the offering. On September 18, 2007, the Company filed a shelf registration statement on Form S-3, which registration statement was amended on October 9, 2007, to cover the resale, from time to time, of up to 4,048,868 shares of the Company's common stock, by Hampshire Equity Partners II, L.P. and its affiliates. Such shares include those from the earlier registration that remain unsold. The registration statement was filed pursuant to the terms of a registration rights agreement between Hampshire Equity Partners II, L.P. and the Company. The selling stockholders may sell any, all or none of their respective shares from time to time in one or more transactions. The Company will not receive any proceeds from the sale of these shares.

9. Adoption of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes

On February 4, 2007, the Company adopted the provisions of FASB interpretation 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"). FIN 48 requires that each tax position be reviewed and assessed with recognition and measurement of the tax benefit based on a "more-likely-than-not" standard with respect to the ultimate outcome, regardless of whether this assessment is favorable or unfavorable. The Company has completed its review and assessment of all tax positions and in the thirty-nine weeks ended November 3, 2007 recorded a net benefit to retained earnings and a decrease to current liabilities of \$301,000 in accordance with the new accounting guidance.

The Company files income tax returns in U.S. Federal and state jurisdictions and is subject to examinations by the IRS and other taxing authorities. At November 3, 2007, there are no benefits taken on the Company's income tax returns that do not qualify for financial statement recognition under FIN 48.

Under FIN 48, if a tax position does not meet the minimum statutory threshold to avoid payment of penalties and interest, a company is required to recognize an expense for the amount of the interest and penalty in the period in which the company claims or expects to claim the position on its tax return. For financial statement purposes, FIN 48 allows companies to elect whether to classify such

charges as either income tax expense or another expense classification. Should such expense be incurred in the future, the Company will classify such interest as a component of interest expense and penalties as a component of income tax expense.

10. Recent Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, "*Fair Value Measures*." SFAS No. 157 defines fair value, establishes a framework for measuring fair value, and requires additional disclosures about fair value measurements. SFAS No. 157 applies to fair value measurements that are already required or permitted by other accounting standards, except for measurements of share-based payments and measurements that are similar to, but not intended to be, fair value and does not change existing guidance as to whether or not an instrument is carried at fair value. The provisions of SFAS No. 157 are effective for the specified fair value measures for financial statements issued for fiscal years beginning after November 15, 2007. The Company is currently evaluating the impact, if any, that the adoption of SFAS No. 157 will have on the Company's financial statements.

In February 2007, the FASB issued SFAS No. 159, "*The Fair Value Option for Financial Assets and Financial Liabilities*." SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS No. 159 applies to all entities that elect the fair value option. The provisions of SFAS No. 159 are effective for fiscal years beginning after November 15, 2007. The Company is currently evaluating the impact, if any, that the adoption of SFAS No. 159 will have on the Company's financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward-Looking Statements

Except for specific historical information, many of the matters discussed in this Form 10-Q may express or imply projections of revenues or expenditures, statements of plans and objectives for future operations, growth or initiatives, statements of future economic performance, or statements regarding the outcome or impact of pending or threatened litigation. These, and similar statements, are forward-looking statements concerning matters that involve risks, uncertainties and other factors that may cause the actual performance of the Company to differ materially from those expressed or implied by these statements. All forward-looking information should be evaluated in the context of these risks, uncertainties and other factors. The words "believe," "anticipate," "project," "plan," "expect," "estimate," "objective," "forecast," "goal," "intend," "will likely result," or "will continue" and similar words and expressions generally identify forward-looking statements. The Company believes the assumptions underlying these forward-looking statements are reasonable; however, any of the assumptions could be inaccurate, and therefore, actual results may differ materially from those projected in the forward-looking statements.

The factors that may result in actual results differing from such forward-looking information include, but are not limited to: transportation and distribution delays or interruptions; changes in freight rates; the Company's ability to negotiate effectively the cost and purchase of merchandise; inventory risks due to shifts in market demand; the Company's ability to gauge fashion trends and changing consumer preferences; changes in consumer spending on apparel; changes in product mix; interruptions in suppliers' businesses; interest rate fluctuations; a continued rise in insurance costs; a deterioration in general economic conditions caused by acts of war or terrorism; temporary changes in demand due to weather patterns; seasonality of the Company's business; delays associated with building, opening and operating new stores; delays associated with building, opening, expanding or converting new or existing distribution centers; and other factors described in the section titled "Item 1A. Risk Factors" and elsewhere in the Company's Annual Report on Form 10-K for the fiscal year ended February 3, 2007 and in Part II, "Item 1A. Risk Factors" and elsewhere in the Company's Quarterly Report on Form 10-Q and in the other documents the Company files with the Securities and Exchange Commission ("SEC"), including other reports on Form 8-K and 10-Q, and any amendments thereto.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this Form 10-Q. Except as may be required by law, the Company undertakes no obligation to update or revise publicly any forward-looking statements contained herein to reflect events or circumstances occurring after the date of this Form 10-Q or to reflect the occurrence of unanticipated events. Readers are advised, however, to read any further disclosures the Company may make on related subjects in its public disclosures or documents filed with the SEC.

Overview

The Company is a rapidly growing, value-priced retailer of urban fashion apparel and accessories for the entire family. The Company's merchandise offerings are designed to appeal to the preferences of fashion conscious consumers, particularly African-Americans. Stores are located in the Southeast, Mid-Atlantic and Midwest regions and the state of Texas. At November 3, 2007, there were 306 stores in operation in both urban and rural markets in eighteen states.

The Company measures its performance using key operating statistics. One of the main performance measures is comparable store sales growth. A comparable store is defined as a store that has been open for an entire fiscal year. Therefore, a store will not be considered a comparable store until its 13th month of operation at the earliest or its 24th month at the latest. As an example, stores opened in fiscal 2006 and fiscal 2007 are not considered comparable stores in fiscal 2007. Relocated and expanded stores are included in the comparable store sales results. Other operating statistics, most notably average sales per store, are utilized in managing the Company. The Company typically occupies existing space in established shopping centers rather than sites built specifically for its stores, and, therefore, store square footage (and sales per square foot) varies by store. The Company focuses on the overall store sales

volume as the critical driver of profitability. Average sales per store have increased from approximately \$0.8 million in fiscal 2000 to approximately \$1.5 million in fiscal 2006. The Company also measures gross profit as a percentage of sales and store operating expenses, with a particular focus on labor as a percentage of sales. These results translate into store level contribution, which is used to evaluate overall performance of each individual store. Corporate expenses are monitored against budgeted amounts.

Accounting Periods

The following discussion contains references to years 2007 and 2006, which represent fiscal years ending or ended on February 2, 2008 (fiscal 2007) and February 3, 2007 (fiscal 2006), respectively. Fiscal 2007 has a 52-week accounting period and fiscal 2006 had a 53-week accounting period. This discussion and analysis should be read with the condensed financial statements and the notes thereto.

Results of Operations

The following discussion of the Company's financial performance is based on the condensed financial statements set forth herein. The nature of the Company's business is seasonal. Historically, sales in the first and fourth quarters have been higher than sales achieved in the second and third quarters of the fiscal year. Expenses and, to a greater extent, operating income vary by quarter. Results of a period shorter than a full year may not be indicative of results expected for the entire year. Furthermore, the seasonal nature of the Company's business may affect comparisons between periods.

Thirty-Nine Weeks Ended November 3, 2007 and October 28, 2006

Net Sales. Net sales increased \$47.8 million, or 18.7%, to \$302.9 million in the thirty-nine weeks ended November 3, 2007 from \$255.1 million in the thirty-nine weeks ended October 28, 2006. The increase in net sales was due primarily to 40 new stores opened since last year's third quarter, 31 new stores opened in the first three quarters of 2006 for which there was not a full thirty-nine weeks of sales in 2006, and a comparable store sales increase of 0.7% on a fiscal basis. Comparable stores include locations that have been relocated or expanded. There have been 12 stores relocated or expanded in the thirty-nine weeks ended November 3, 2007 and 7 stores relocated or expanded in fiscal 2006, all of which have impacted comparable store sales. Sales in these comparable relocated and expanded stores increased 18.0% in the thirty-nine weeks ended November 3, 2007, while sales in all other comparable stores decreased 0.9%. Sales in each period of 2007 are affected by the calendar shift caused by the last fiscal year having 53 weeks. Each period in 2007 begins and ends one week later than the same period of 2006, which can have a significant impact on sales comparisons if those two beginning and ending weeks of the period have different levels of sales volume. In the first thirty-nine weeks of 2007, sales in comparable stores for comparable calendar weeks increased 1.9% due to an increase in the average transaction size, partially offset by a slight decrease in the number of customer transactions. Comparable store sales changes by major merchandise class were as follows in the first thirty-nine weeks of 2007: Children's +5%; Home +3%; Women's +1%; Accessories 0% and Men's 0%.

The new stores opened in 2006 and 2007, which are not yet included in comparable store sales, accounted for \$46.1 million of the total increase in sales, while the sales increase in the 235 comparable stores contributed \$1.7 million.

Gross Profit. Gross profit increased \$13.8 million, or 14.2%, to \$111.3 million in the first thirty-nine weeks of 2007 from \$97.5 million last year. The increase in gross profit is a result of the increase in sales, partially offset by a reduction in the gross margin. As a percentage of net sales, gross profit decreased to 36.7% from 38.2% in last year's first three quarters, due to a 150 basis points increase in merchandise markdowns as a percent of sales. Most of this increase in markdowns occurred in the third quarter due to negative comparable store sales during the months of September and October. These two months are critical in terms of clearing Spring/Summer merchandise and preparing for the upcoming Fall/Winter/Holiday season. With comparable store sales being negative during those months, higher clearance markdowns were necessary. Inventory shrinkage was approximately 40 basis points higher year-over-year during the first thirty-nine weeks of 2007; however, this was offset by a slightly higher initial merchandise mark-up and slightly lower freight costs.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$18.4 million, or 24.2%, to \$94.6 million in the first thirty-nine weeks of 2007 from \$76.2 million last year. The increase in these expenses was due primarily to additional store level, distribution and corporate costs arising from the opening of 40 new stores since October 28, 2006, and approximately \$600,000 of expenses related to a secondary stock offering and stock registration. As a percentage of sales, selling, general and administrative expenses increased in the first thirty-nine weeks of 2007 to 31.2% from 29.9% last year, due primarily to the deleveraging effect that occurs on expenses as a percentage of sales when comparable store sales increase at a rate, 0.7%, that is lower than the rate of inflation on expenses. In particular, occupancy expenses as a percentage of sales were up 60 basis points and payroll was up 50 basis points. Additionally, the stock offering and registration expenses amounted to 20 basis points of sales.

Depreciation and Amortization. Depreciation and amortization expense increased \$3.1 million, or 52.9%, to \$9.1 million in the first thirty-nine weeks of 2007 from \$6.0 million in the first thirty-nine weeks of 2006, as the result of capital expenditures incurred for new and relocated/expanded stores and for new scanning technology used in the stores.

Interest Income. Interest income increased to \$1.7 million from \$1.4 million in last year's first thirty-nine weeks, due primarily to having a higher level of cash and marketable securities this year as a result of cash flows since October 28, 2006.

Interest Expense. Interest expense increased to \$372,000 in the first thirty-nine weeks of 2007 from \$168,000 last year due to the addition of a \$4.8 million capital equipment lease in 2006.

Provision for Income Taxes. The provision for income taxes decreased to \$3.1 million in this year's first thirty-nine weeks from \$5.6 million in 2006. The effective income tax rate in the first thirty-nine weeks of 2007 was 34.9% compared to 34.0% last year. In 2007, taxable income is expected to be taxed for federal purposes at a rate of approximately 35% versus the 34% rate used in 2006, because the significant tax deductions for stock option exercises realized in 2006 are not expected to occur in 2007 at the same level as last year. The Company's effective tax rate tends to be below the combined statutory federal and state rate due to tax-exempt interest income and various tax credits.

Net Income. Net income decreased 46.8% to \$5.8 million in the first thirty-nine weeks of 2007 from \$11.0 million last year due to the factors discussed above.

Thirteen Weeks Ended November 3, 2007 and October 28, 2006

Net Sales. Net sales increased \$12.4 million, or 14.2%, to \$99.5 million for the thirteen weeks ended November 3, 2007 from \$87.1 million in the thirteen weeks ended October 28, 2006. The increase in net sales was due primarily to 40 new stores opened since last year's third quarter, net of the effect of a comparable store sales decrease of 2.7% on a fiscal quarter basis, which consisted of a decline in customer transactions, partially offset by a slight increase in the average transaction size. Comparable stores include locations that have been relocated or expanded. There have been 12 stores relocated or expanded in the thirty-nine weeks ended November 3, 2007 and 7 stores relocated or expanded in fiscal 2006, all of which have impacted comparable store sales. Sales in these comparable relocated and expanded stores increased 24.3% in the thirteen weeks ended November 3, 2007, while sales in all other comparable stores decreased 5.2%. Sales in each quarter of 2007 are affected by the calendar shift caused by last year having 53 weeks. Each quarter in 2007 begins and ends one week later than the same quarter of 2006, which can have a significant impact on quarterly sales comparisons if those two beginning and ending weeks of the quarter have different levels of sales volume. In the third quarter of 2007, sales in comparable stores for comparable calendar weeks increased 1.9%. Comparable store sales changes by major merchandise class were as follows in the third quarter of 2007: Women's +2%; Children's +6%; Home +1%; Men's +1% and Accessories -2%.

The new stores opened in 2006 and 2007, which are not yet included in comparable store sales, accounted for \$14.5 million of the total increase in sales, while the sales decrease in the 235 comparable stores totaled \$2.1 million.

Gross Profit. Gross profit increased \$1.5 million, or 4.7%, to \$34.5 million in the third quarter of 2007 from \$33.0 million in last year's third quarter. The increase in gross profit is a result of the increase in sales, partially offset by a reduction in the gross margin. As a percentage of net sales, gross profit decreased to 34.7% from 37.8% in the third quarter of 2006. This decrease was primarily a result of a 380 basis point increase in merchandise markdowns as a percentage of sales, partially offset by slight improvements in the initial merchandise mark-up and freight costs. The higher markdowns were caused by negative comparable store sales during the months of September and October. These two months are critical in terms of clearing Spring/Summer merchandise and preparing for the upcoming Fall/Winter/Holiday season. With comparable store sales being negative during those months, higher clearance markdowns were necessary.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$5.3 million, or 19.5%, to \$32.5 million in the third quarter of 2007 from \$27.2 million in last year's third quarter. The increase in these expenses was due primarily to additional store level, distribution and corporate costs arising from the opening of 40 new stores since October 28, 2006. As a percentage of sales, selling, general and administrative expenses increased in the third quarter of 2007 to 32.6% from 31.2% last year, due to the deleveraging effect that occurs on expenses as a percentage of sales when comparable store sales decrease 2.7%, while expenses continue to increase as a result of normal inflationary pressures. In particular, occupancy expenses as a percentage of sales were up 80 basis points and payroll was up 40 basis points.

Depreciation and Amortization. Depreciation and amortization expense increased \$1.2 million, or 59.3%, to \$3.3 million in the third quarter of 2007 from \$2.1 million in the third quarter of 2006, as the result of capital expenditures incurred for new and relocated/expanded stores and for new scanning technology used in the stores.

Interest Income. Interest income increased to \$521,000 in the third quarter of 2007 from \$476,000 in the third quarter of 2006, due primarily to having a higher level of cash and marketable securities this year as a result of cash flows since October 28, 2006.

Interest Expense. Interest expense increased to \$107,000 in the third quarter of 2007 from \$90,000 in the third quarter of 2006 due to the addition of a \$4.8 million capital equipment lease during the third quarter of 2006.

Provision (Benefit) for Income Taxes. Due to a loss in this year's third quarter, the Company recognized an income tax benefit of \$277,000, whereas the third quarter of 2006 included an income tax provision of \$1,337,000. The effective income tax rate in the third quarter of 2007 was 35.0% compared to 32.2% last year. In 2007, taxable income is expected to be taxed for federal purposes at a rate of approximately 35% versus the 34% rate used in 2006, because the significant tax deductions for stock option exercises realized in 2006 are not expected to occur in 2007 at the same level as last year. The Company's effective tax rate tends to be below the combined statutory federal and state rate due to tax-exempt interest income and various tax credits.

Net Income (Loss). A net loss of \$513,000 was recognized in the third quarter of 2007 compared to net income of \$2,809,000 in last year's third quarter due to the factors discussed above.

Liquidity and Capital Resources

Current Financial Condition. As of November 3, 2007, the Company had total cash and marketable securities of \$52.4 million compared with total cash and marketable securities of \$77.7 million at February 3, 2007. The most significant factors in the change in the Company's net liquidity position during the first thirty-nine weeks of 2007 were the seasonal build of inventory associated with the Fall/Winter selling season and the addition of inventory and fixed assets for new stores, partially offset by net income adjusted for depreciation and other non-cash charges. Accounts payable did not increase as would typically be the case when inventory increases, because inventory turns slowed down, particularly in the last two months of the third quarter when comparable store sales were

negative. The decline in inventory turns caused the Company to take more merchandise markdowns, as discussed in the Gross Profit section above, and slow down purchases in the third quarter, which resulted in less accounts payable as of November 3, 2007.

Inventory represented approximately 46% of the Company's total assets as of November 3, 2007. Management's ability to manage its inventory can have a significant impact on the Company's cash flows from operations during a given interim period or fiscal year. In addition, inventory purchases can be

somewhat seasonal in nature, such as the purchase of warm-weather, back-to-school or Christmas-related merchandise.

Operating Cash Flows. Net cash used in operating activities was \$9.2 million in the thirty-nine weeks ended November 3, 2007 compared to \$6.9 million in the thirty-nine weeks ended October 28, 2006. The main sources of cash provided during the thirty-nine weeks ended November 3, 2007 were \$13.5 million of net income adjusted for depreciation and other non-cash charges. The main uses of cash consisted of the increase in inventory of \$20.5 million.

Investing Cash Flows. Net cash provided by investing activities was \$4.0 million in the thirty-nine weeks ended November 3, 2007, compared to net cash used in investing activities of \$5.2 million in the thirty-nine weeks ended October 28, 2006. Investment activities in marketable securities include net redemptions of \$22.2 million of municipal auction rate securities primarily for use in the purchase of inventory. Capital expenditure activities consisted of \$18.2 million used for the purchase of property and equipment for the build out of 29 new stores, 12 store relocations/expansions, the purchase of one of the Company's distribution center/office building locations that had previously been leased, the start-up of construction work on the expansion of the Darlington, South Carolina distribution center, and other general corporate purposes. Capital expenditures during fiscal 2007 are projected to be approximately \$32 million to \$34 million. The Company anticipates funding its fiscal 2007 and longer term capital requirements with cash flows from operations and cash and marketable securities held on the balance sheet.

Financing Cash Flows. Net cash provided by financing activities was \$2.2 million in the thirty-nine weeks ended November 3, 2007 and \$8.7 million in the thirty-nine weeks ended October 28, 2006. Financing activities in the thirty-nine weeks ended November 3, 2007 included the tax benefit from stock option exercises of \$3.2 million, the receipt of \$382,000 from options exercised, and scheduled repayments of \$1.4 million on outstanding capital leases.

Cash Requirements

The Company's cash requirements are primarily for working capital, construction of new stores, remodeling of existing stores, improvements to its distribution infrastructure and improvements to its information systems. The Company is in the process of expanding its distribution center in Darlington, South Carolina and implementing a new warehouse management system. The aggregate cost of these projects is expected to range from \$14 million to \$15 million, of which approximately \$2.3 million has been paid through November 3, 2007. Historically, the Company has met its cash requirements from cash flow from operations, short-term trade credit, borrowings under the revolving lines of credit, long-term debt, capital leases and cash held on the balance sheet. The Company expects to be able to meet its cash requirements for at least the next twelve months using cash flow from operations and existing cash balances.

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company believes the following critical accounting policies describe the more significant judgments and estimates used in the preparation of the financial statements:

Revenue Recognition

While the recognition of revenue is predominantly derived from routine retail transactions and does not involve significant judgment, revenue recognition represents an important accounting policy of the Company. The Company recognizes retail sales, net of sales taxes, at the time the customer takes possession of the merchandise and purchases are paid for, less an allowance for returns. The Company allows for returns up to ten days after the date of sale and the estimate for returns is based on actual observed return activity ten days after the period ends. Revenue from layaway sales is recognized when the customer has paid for and received the merchandise. Layaway service charges, which are non-refundable, are recognized in revenue when collected. All sales are from cash, check or major credit card company transactions.

Inventory

Inventory is stated at the lower of cost (first-in, first-out basis) or market as determined by the retail inventory method less a provision for estimated inventory shrinkage. Under the retail inventory method, the cost value of inventory and gross margins are determined by calculating a cost-to-retail ratio and applying it to the retail value of inventory. Inherent in the retail inventory calculation are certain significant management judgments and estimates, including, among others, merchandise markups, markdowns and shrinkage, which impact the ending inventory valuation at cost as well as resulting gross margins. The Company estimates shrinkage for the period between the last physical count and the balance sheet date. The estimate for the shrinkage reserve can be affected by changes in actual shrinkage trends. The Company believes the first-in, first-out retail inventory method results in an inventory valuation that is fairly

stated. Many retailers have arrangements with vendors that provide for rebates and allowances under certain conditions, which ultimately affect the value of the inventory. The Company does not generally enter into such arrangements with its vendors.

Property and Equipment, net

The Company has a significant investment in property and equipment. Property and equipment are stated at cost less accumulated depreciation. Equipment under capital leases is stated at the present value of minimum lease payments. Depreciation and amortization are computed using the straight-line method over the lesser of the estimated useful lives (primarily three to five years for computer equipment and furniture, fixtures and equipment, five years for leasehold improvements and fifteen years for buildings) of the related assets or the relevant lease term, whichever is shorter. Any reduction in these estimated useful lives would result in a higher annual depreciation expense for the related assets.

Impairment of Long-Lived Assets

The Company continually evaluates whether events and changes in circumstances warrant revised estimates of the useful lives or recognition of an impairment loss for long-lived assets. Future adverse changes in market and legal conditions, or poor operating results of underlying assets could result in losses or an inability to recover the carrying value of the long-lived asset, thereby possibly requiring an impairment charge in the future. If facts and circumstances indicate that a long-lived asset, including property and equipment, may be impaired, the carrying value is reviewed. If this review indicates that

the carrying value of the asset will not be recovered as determined based on projected undiscounted cash flows related to the asset over its remaining life, the carrying value of the asset is reduced to its estimated fair value. Impairment losses in the future are dependent on a number of factors such as site selection and general economic trends, and thus could be significantly different from historical results. To the extent the Company's estimates for net sales, gross profit and store expenses are not realized, future assessments of recoverability could result in impairment charges.

Stock-Based Compensation

The Company adopted SFAS No. 123 (revised 2004) *Share-Based Payment* ("SFAS No. 123R") at the start of the first quarter of fiscal 2006. SFAS No. 123R requires the measurement and recognition of compensation expense for all stock-based awards made to employees based on estimated fair value of the award. The determination of the fair value of the Company's stock options on the date of grant using an option-price model is affected by the stock price as well as assumptions regarding a number of complex and subjective variables. These variables include, but are not limited to, the expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. The fair values of options issued pursuant to the stock based compensation plans at each grant date were estimated using the Black-Scholes Merton option pricing model. Total stock-based compensation costs related to nonvested shares is calculated based on the fair market value of the shares on the date of grant times the number of shares granted. The compensation expense is recorded on a straight line basis over the requisite service period of the stock recipients which is equal to the vesting period of the stock. If factors change and the Company employs different assumptions in the application of SFAS No. 123R in future periods, the compensation expense recorded under SFAS No. 123R may differ significantly from the amount recorded in the current period.

Operating Leases

The Company leases all of its store properties and accounts for the leases as operating leases in accordance with SFAS No. 13, *Accounting for Leases*. Many lease agreements contain tenant improvement allowances, rent holidays, rent escalation clauses and/or contingent rent provisions. For purposes of recognizing incentives and minimum rental expenses on a straight-line basis over the terms of the leases, the Company uses the date of initial possession to begin amortization, which is generally when the Company enters the space and begins to make improvements in preparation of intended use.

For scheduled rent escalation clauses during the lease terms or for rental payments commencing "rent holidays" at a date other than the date of initial occupancy, the Company records minimum rental expenses on a straight-line basis over the terms of the leases. For tenant improvement allowances, the Company records a deferred rent liability on the balance sheet and amortizes the deferred rent over the terms of the leases.

Certain leases provide for contingent rents that are not measurable at inception. These contingent rents are primarily based on a percentage of sales that are in excess of a predetermined level. These amounts are excluded from minimum rent and are included in the determination of total rent expense when it is probable that the expense has been incurred and the amount is reasonably estimable.

Accounting for Income Taxes

The Company accounts for income taxes in accordance with SFAS No. 109, *Accounting for Income Taxes*. The computation of income taxes is subject to estimation due to the judgment required and the uncertainty related to the recoverability of deferred tax assets or the outcome of tax audits. The Company adjusts its income tax provision in the period it is determined that actual results will differ from its estimates. Tax law and rate changes are reflected in the income tax provision in the year in which such changes are enacted.

The above listing is not intended to be a comprehensive list of all the Company's accounting policies. In many cases the accounting treatment of a particular transaction is specifically dictated by U.S. generally accepted accounting principles, with no need for management's judgment in their application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The market risk of the Company's financial instruments as of November 3, 2007 has not significantly changed since February 3, 2007. The Company's risk profile as of February 3, 2007 is disclosed in Quantitative and Qualitative Disclosures About Market Risk included in the Company's Annual Report on Form 10-K for the fiscal year ended February 3, 2007.

Item 4. Controls and Procedures.

The Company has carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of November 3, 2007 pursuant to Rule 13a-15 and 15d-15 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer each concluded that the Company's disclosure controls and procedures are effective in ensuring that all information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. There were no changes in internal controls over financial reporting during the fiscal quarter ended November 3, 2007 identified in connection with the Chief Executive Officer's and Chief Financial Officer's evaluation that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings.

The Company from time to time is involved in various legal proceedings incidental to the conduct of its business, including claims by customers, employees or former employees. While litigation is subject to uncertainties and the outcome of any litigated matter is not predictable, the Company is not aware of any legal proceedings pending or threatened against it that it expects to have a material adverse effect on its financial condition, results of operations or cash flows.

Item 1A. Risk Factors.

There are no material changes to the Risk Factors described under the sections "ITEM 1A. RISK FACTORS" in the Company's Annual Report on Form 10-K for the fiscal year ended February 3, 2007 and the Company's Quarterly Report on Form 10-Q for the quarter ended May 5, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Not applicable.

Item 3. Defaults Upon Senior Securities.

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders.

Not applicable.

Item 5. Other Information.

Not applicable.

Item 6. Exhibits.

Exhibits

- 31.1 Certification of Chief Executive Officer Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.*
- 31.2 Certification of Chief Financial Officer Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.*
- 32.1 Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.* †

* Filed herewith.

† Pursuant to Securities and Exchange Commission Release No. 33-8238, this certification will be treated as "accompanying" this Quarterly Report on Form 10-Q and not "filed" as part of such report for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of Section 18 of the Securities Exchange Act of 1934 and this certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Securities Exchange Act 1934, except to the extent that the registrant specifically incorporates it by reference.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized, and the undersigned also has signed this report in his capacity as the Registrant's Secretary and Chief Financial Officer (Principal Financial Officer).

Title: Secretary and Chief Financial Officer

CERTIFICATION

I, R. Edward Anderson, Chief Executive Officer of Citi Trends, Inc., certify that:

1. I have reviewed this Quarterly Report on Form 10-Q for the period ended November 3, 2007, of Citi Trends, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
